

TAILORED SUPPORT FOR HOTEL TEAMS

Beyond training. *Better operations.*

Operational advisory, training and better ways of working for hospitality.

PEOPLE · INNOVATION · FRAMEWORKS

OUR VISION

Operational excellence is built on three foundations.

An exceptional guest experience depends on capable, engaged teams, ways of working that fit the reality of hotel operations, and standards that remain useful over time.

Our approach brings these dimensions together to improve operations while preserving what makes each property distinctive.

01

PEOPLE

Develop skills and help teams grow.

Training, leadership, onboarding, management support, autonomy and transfer of know-how.

02

INNOVATION

Modernise ways of working.

Hotel technology, operational tools, digital transformation, automation and practical uses of AI.

03

FRAMEWORKS

Structure and sustain excellence.

Service standards, SOPs, checklists, competency frameworks, routines and monitoring tools.

Develop people, improve practices and build the reference points that keep excellence in place over time.

TRAINING MODULES

Six areas of training.

Choose or combine modules around the priorities of each project, then adapt them to the relevant roles and teams.

PEOPLE

01 **Service excellence and guest relations**
Guest journey, service sequences, complaints and the quality of every interaction.

02 **Management and leadership**
Briefings, feedback, delegation, team engagement and presence on the floor.

03 **Onboarding and skills development**
Integration, autonomy, knowledge transfer and career progression.

INNOVATION

01 **Hotel tools, digital transformation and AI**
Adoption of operational tools, evolving practices and practical uses of AI.

FRAMEWORKS

01 **Standards, procedures and operational organisation**
SOPs, checklists, quality checks, handovers and coordination across departments.

02 **Pre-openings, reopenings and change management**
Team preparation, new processes and lasting changes in practice.

Real situations.
Repeatable service.

SERVICE STANDARDS

Standards that work during a busy shift.

We turn written expectations into behaviours that teams can understand, practise and maintain when service gets demanding.

Guest-facing moments

Arrival, check-in, requests, complaints, recovery and personalised service.

Department execution

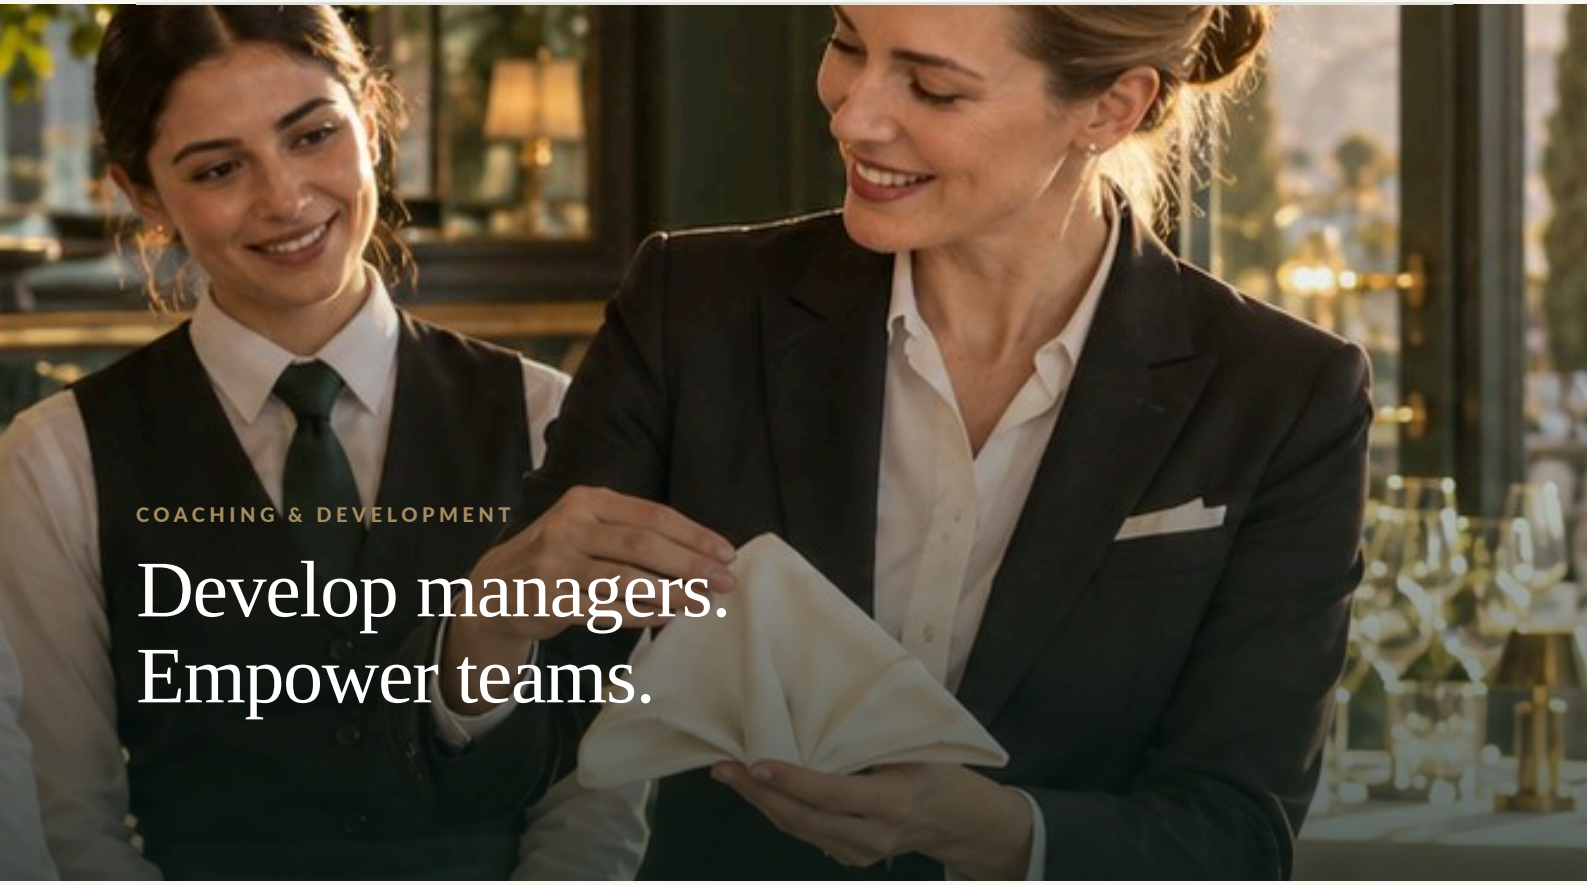

Room quality, inspections, F&B sequences, spa standards and quality control.

Service coordination

Handovers, escalation, cross-department communication and consistent follow-up.

Practical reinforcement

Role-play, observation, short checklists and manager coaching points.

COACHING & DEVELOPMENT

Develop managers. Empower teams.

Better management and clearer learning paths have an impact well beyond a single training day.

Management coaching

Lead useful briefings, give constructive feedback, delegate clearly and build stronger team routines.

Employee development

Identify skills gaps, build autonomy and create practical progression steps for operational roles.

Onboarding & autonomy

Structure the first weeks, clarify expectations and help new colleagues integrate with confidence.

Train-the-trainer

Equip supervisors and experienced team members to pass on knowledge consistently.

DIGITAL ADOPTION

A better tool only works when people know how to use it.

We help connect hotel technology with real operating procedures, whether you are introducing a new platform or making better use of the systems already in place.

From implementation to confident daily use.

01
Understand current workflows and team needs

02
Align procedures, roles and system usage

03
Train staff with real hotel scenarios

04
Reinforce adoption and resolve recurring gaps

Property management

PMS workflows, reservations, check-in and check-out, billing, night procedures and handovers.

Guest-facing platforms

Guest requests, messaging, CRM workflows and coordination between operational teams.

Housekeeping & tasks

Room status, inspections, maintenance reporting, task ownership and follow-up routines.

F&B & team tools

POS workflows, reservations, schedules, checklists and other platforms used by your departments.

OPERATIONAL ADVISORY & SUPPORT

Support the mission.
Move operations forward.

Four complementary ways to improve operations, from preparing a launch to supporting continuous improvement.

01

Pre-opening, reopening and seasonal restart

Prepare teams, clarify responsibilities and test standards before service begins.

02

Operational structures and frameworks

Develop useful procedures, quality routines and shared reference points.

03

Digital transformation and tool adoption

Connect hotel technology to operational processes and support everyday use.

04

On-site support and continuous improvement

Observe practices, address gaps and support managers over time.

Focused projects or longer-term support · On-site or remote · In English or French

THE LUXOPS METHOD

A practical method.
A partnership between professionals.

People, Innovation and Frameworks define where we act. The four stages below describe how we carry out a mission in any of these areas.

01 Assess

Understand priorities, observe practices and define a useful scope.

02 Adapt

Tailor materials, methods and tools to the teams involved.

03 Practise

Work through real situations with demonstrations and actionable feedback.

04 Embed

Equip managers to monitor application and sustain progress.

WAYS TO COLLABORATE

LuxOps brings training, advisory and operational support together with the expertise involved in each project.

- Delivering training modules
- Designing and adapting learning programmes
- Additional operational support on a project
- Supporting organisational change

ABOUT

Belkheir Bekhedda

15 years in operational excellence and luxury hospitality.

HOSPITALITY OPERATIONS & DIGITAL TRANSFORMATION

With more than 15 years in luxury hospitality and international hotel groups, Belkheir Bekhedda has progressed from hands-on operations to hotel leadership.

His experience spans multidisciplinary team management, pre-openings and organisational change. He connects high service expectations with employee development and better ways of working.

Today, his work focuses on operational advisory, process improvement, training and digital transformation, grounded in the reality of hotel teams.
